About Us

Hello! We're Bamboo Co.

A company founded and based in Argentina, builders of the most popular brand in Latin America for Ukuleles and Guitars.

Our line is specially-crafted for music enthusiasts of all ages and skills around the world.

Our products are available in Argentina, Mexico, Japan, Spain, Czech Republic, Peru, Italy, Portugal, Brazil, Uruguay and the USA.

Local illustrators and graphic artists are the masterminds behind the lively and colorful aesthetic we are so proud of. Their source of inspiration and creativity comes directly from nature and its resources, giving people the chance to go beyond music, holding not only a music instrument but a meaningful piece of art and design.

We believe that music leads the road to human connection and cooperation. And that's our lifestyle. We believe in music as a path to promote meaningful human connection and bonding within communities and a powerful tool to support and display local culture and diverse voices. So we are deeply committed to local communities by supporting NGO's related with music education and social aid and also reaching out and inviting local artists to join our promoting platforms.

Bamboo was founded in 2018 and in less than two years it has achieved a remarkable international position due to the versatility and intensive digital presence based on digital marketing, e-commerce and social media. Our plan is to become worldwide leaders in our segment with honest focus on social and environmental sustainability for a better world. We invite you now to join us and be part of this musical change.

Music is life.

New Generation Series

Designed by young artists, this series is inspired by experiences, dreams, travel, nature, and symbols that make their illustrations and overall aesthetics stand out.

Through these instruments, we want people feel instantly identified and connected with the design that resonates the most with their personality.

They are built in linden, a very light wood that generates a warm and balanced sound with a great midrange and good sustain.

01/

MANDALA LINE

[CHECK REVIEW](#) 

Mandala are figures that represent the unity, harmony and infinity of the universe through the balance of visual elements. With this series, we want to connect the deepest values of the universe with music.

Classic Series

The special core of this series lays on the diversity of woods of each instrument that vary according to aesthetics, sound and tonality. These instruments are endowed with unique and beautiful patterns that provide nuance and a distinct musical experience. Due to the nature of the wood veins, almost all ukuleles in this series have a certain level of variation in their appearance making of each piece unique.

01/ BAMBOO

[CHECK REVIEW](#)

Bamboo is well known as the most sustainable wood for the construction of instruments. This wood regenerates quickly and its collection does not produce deforestation. The straight, multi-layered veins of wood give this series a very natural look. Combined with maple wood, these instruments are characterized by their bright tone with great volume, harmonic, projection and sustain.

03/ SOLID CEDAR

[CHECK REVIEW](#)

The top of these ukuleles is made of solid cedar wood with walnut back and sides. They also present a handmade rosette and border made with different types of wood. Cedar gives these instruments a sound that stands out for its brilliance and high volume.

The combination with walnut, provides an amplitude in the bass and a perfect sustain, achieving a very characteristic balanced sound.
